Todd, are you indicating that (b) (6) well needs to be sampled? Or are you referring to (b) (6) I thought GW-14 was (b) (6) well and it is accessible (I thought I was tagging along during one of your sampling events and this was one sampled..) In addition, GW-11 is one in the east tank farm that will need to be verified for access.

**Subject:** RE: Wilcox TO 128 - Tap Sampling

I have several comments on figure 14:

1. GW-8 is in the wrong location (the other figure is incorrect). The residence is located to the south and cut off of the aerial photo in the figure.
2. GW-14 may not be an option to sample. Will need to be field verified.
3. The residential well located on the furthest northern edge of the north tank farm should be added.
4. A well located at the south east residence on the Wilcox processing area might be able to be sampled. Would need to be field verified.

Attached is a map with well locations indicated. Some of the nomenclature is for DEQ sampling purposes, so disregard those designations.

Thank you.

Katrina,

Would it be ok to send the attached to Todd for clarification on the location of our GW-08 (Figure 14)? We placed our GW-08 in the location of LWGW-8 (see attached figures). However, during the call Todd had said that he remembered GW-08 as a location further south. If I could get clarification that would be great.

Thanks,
